

Organisation roles

In addition to the **four project roles**, organisations provide an additional two roles: Org member and Org admin.

- Org members can:
 - Add lines, stations and records to all projects within the organisation
 - View records and stations in all projects within the organisation
 - Run reports against all projects within the organisation
- Org admins can:
 - Do everything a project administrator can do, to any project within the organisation
 - Add and remove people from the organisation (and thus the member projects)
 - Change an organisation members role
