Sorting installations

On the Traps, Bait Stations, or Monitoring Stations section of your project, you can sort the order in which your installations appear in the table underneath the map (once you've clicked the "Show results" button). Clicking on a column heading will sort them by that column. Click the heading again to reverse the sort order.

Show row weights

Number/Code	Type	Line ∧	Installed	Tags	Last record
✛ PT01	DOC 250	Park traps	27 Aug 2019		2020-12-02
✛ PT02	DOC 250	Park traps	27 Aug 2019		2021-04-15
✛ PT03	DOC 250	Park traps	27 Aug 2019		2020-12-02
✛ PT04	DOC 250	Park traps	27 Aug 2019		2020-12-02

Custom sort order

You can also manually sort the order in which installations are listed in the table.

Please note that with the new trap overview page you will still temporarily have to use the "old view" found under the "traps" heading to gain access to the ability to sort

Traps

Take me back to the old view.

Sorting all installations in a line

You might want to make the order in which installations are listed on a line match the order in which you check them. If you use the mobile app to enter installation records (recommended), this can make recording data in the

field more efficient.

Before you can sort your installations, you need to make sure that you are viewing all the installations for a line. To do this, use the filter options at the top of the page.
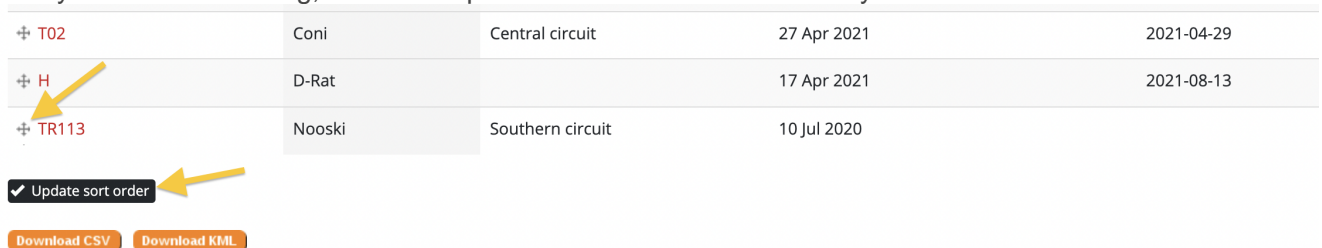

1. Navigate to the Traps, Bait Stations, or Monitoring Stations section of your project.

2. Select the line you want to sort from the "Line" dropdown in the filter bar.

3. Select "- All -" from the "Items per page" dropdown.

4. Click "Show results"

Active/Retired	Number/Code	Line	Tags	Items per page	
Active ⌄		- Any - ⌄	◯	- All - ⌄	Show results Rese
	Starts with...				

5. You can now manually sort your installations into whatever order you like. Click the handle to the left of its Number/Code, and drag it up or down

6. When you are done sorting, click the "Update sort order" button so that your hard work is saved!
