

Adding one-off records

A one-off record does not need to have a permanent location attached to it.

You may want to add one-off catches for various reasons, from shooting to road kill and predation.

To add a one-off record on the website

1. Click the One-off record tab.

2. This will open the one-off pest form, where you can add the information needed to record your catch.

3. Select the “draw a point “ button to add a location.

4. Don't forget to save to catches.

You will currently find your records in the trap records tab and reporting.

Revision #1
