App: Adding installations

https://www.youtube.com/embed/gNuHsNTCHEQ

To add an installation to your project

1. Locate where you want to add the installation on the map. You can do this by:
   - Using the pan and zoom controls to the desired location on the map, and press the Add button ⊠ in the bottom right of the screen.
   - If you are physically at the installation site, use the GPS button ⊠ to locate yourself on the map.

2. If the location appears wrong, drag the reticule (black crosshairs with red dot in the middle) to the correct spot and press the green tick to confirm (or the red cross to cancel).

3. Choose which type of installation to add: Bait Station, Trap , Monitoring Site

Add Installation

Bait Station

Trap

Monitoring Site
