

App Open Beta testing

Trap.nz Open Beta Testing allows Trap.nz app users to experience the next level functionality early. It comes 'warts n all' so may have bugs, but this is your chance to help identify and fix those, why feeling like a next level trapper!

! Please be aware that we can provide limited support where a beta release has been used and data quality has been effected.

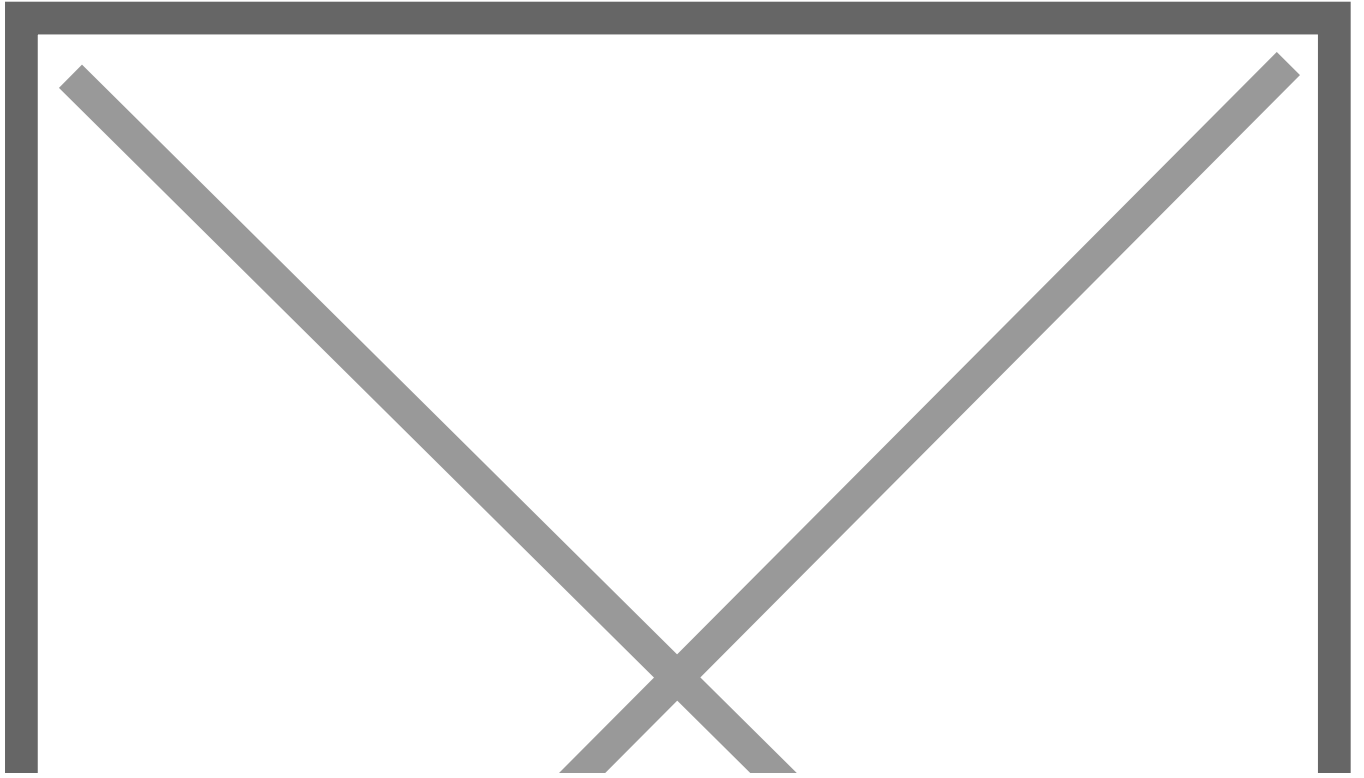

One off Android beta installs

Occasionally, we release app beta installations for instant access (bypassing the Play Store process.) The listings are available for a short time, therefore the following may have already expired:

[v6.3.6 \(QR / NFC\)](#)

By default, Android will prevent this until **Internal app sharing** is enabled. This can be done with the following instructions:

1. Open Play Store.
2. Navigate to Setting. (Click on the account profile picture. which is located at the top right corner of the screen)
3. To Enable Developer Options. (Goto > **About** Section. and Tap seven times on the Play Store Version)
4. Once you get the "You are now a developer!" prompt, you will see the "Internal App Sharing" option in the **General | User Controls** Section.
