

# Deleting installation records

1. View all of the relevant installations by going to "Traps", "Bait stations", "Monitoring" or "Point of interest" from the project menu.
2. Select the installation that you wish to delete records from. You should be able to see the name of the installation, a map of its location, and under the map, all the records associated with it.
3. Find the record that you wish to delete from the table below the map, and click the red "delete" button at the end of the row.
4. Click the red "Delete" button on the confirmation page to delete the record.
