

Downloading CSV files from your project

You can download your project information to back up your project files. The download file will show in CSV format

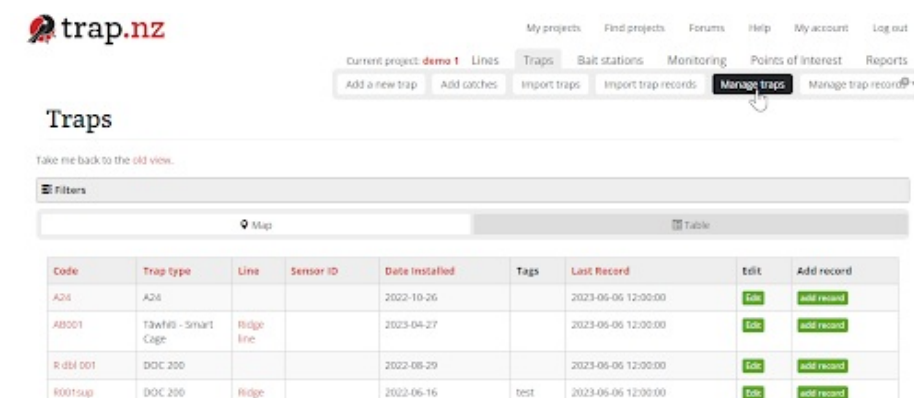

Downloading installations

To download records choose the type of installations you want the information for

Step 1 Click on the installation type

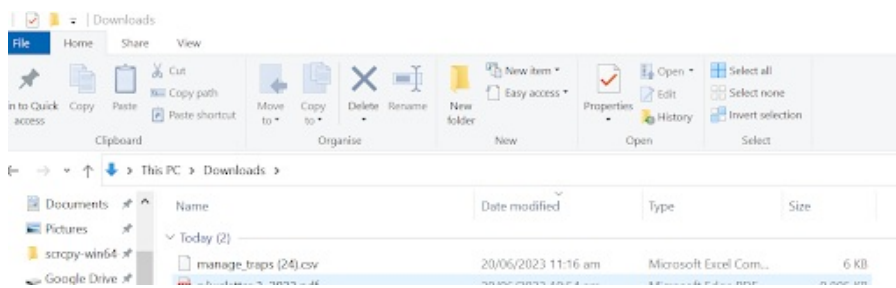

Step 2 Select the “manage “ type wanted, in this case, trap

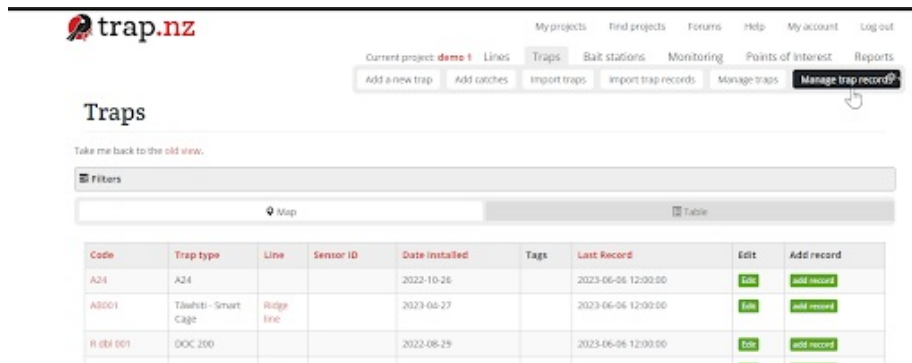

Step 3 Scroll to the bottom of the page and click “download CSV

This download will now appear on your file menu under the downloads

To download the records attached to the installations repeat steps 1, 2, and 3, however, this time select the “manage records” tab in step 2
