# Map features

By default, only the **Filters** list is shown. This allows you to select which kind of stations are visible on the map.

To enable additional map features visit the General Settings screen.

Base maps

Satellite

Shows photographic satellite images.

Streets

Shows a street map. This must be enabled by selecting Topology in General settings.

Layers

Parcel boundaries

Provides an outline of land, road, and other parcel boundaries, and is especially useful for displaying property boundaries. Enabled by selecting Parcel boundaries in General settings.

Filters

Allows you to adjust the default map view showing traps, bait, monitoring stations, and points of interest.
