

Retiring an installation via the trap.NZ website

Retiring an installation

Retiring an installation is used when you are no longer wanting an installation in its current position.

When you're moving an installation it's important to remember that the records stay with the installation, not the site (unless the installation is being moved a large distance then they will retire to the original site). To ensure that your records correctly report the information for that particular site you should retire them.

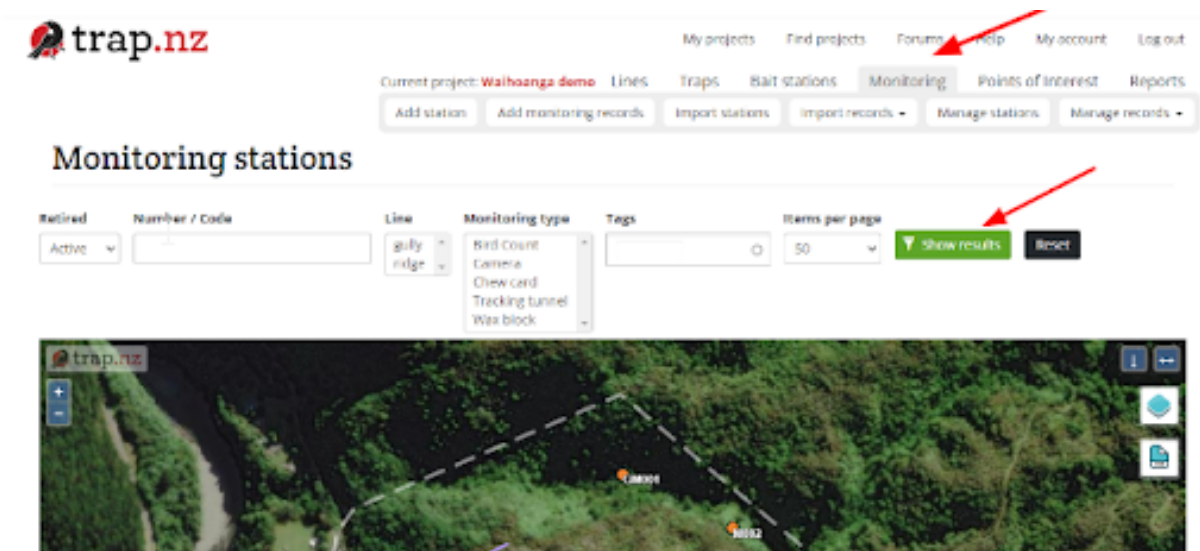

The following **retire** instructions apply for all installation types - Traps, Bait stations, and Monitoring stations. Points of interest have a time expiration so are not included.

Installations can be made **active** again using the same procedure.

There are two ways to retire an installation via the trap.NZ website

Retiring a single installation

1. On your project page, select the type of installation you are wanting to retire and select **show results**

2. This will then show all the installations of the type you have selected in this project. Choose the installation you would like to retire

[Add station](#)
[Add monitoring records](#)
[Import stations](#)
[Import records](#)
[Manage stations](#)
[Manage records](#)

Note that you need to show all traps in the table if you want to set their sort order. You can click the table column names to quickly sort alphabetically. Click "Show/hide row weights" to switch between drag & drop or manual sort numbering.

[Show row weights](#)

Number / Code	Line	Type	Tags
GM001	gully	Bird Count	
M002		Bird Count	
bird	ridge	Bird Count	
m1		Chew card	
mon001	ridge	Tracking tunnel	

[Update sort order](#)
[Download CSV](#)
[Download KML](#)

3. This will open the installation page. You can now choose **Edit**

[Add station](#)
[Add monitoring records](#)
[Import stations](#)

ridge

☒ Retired

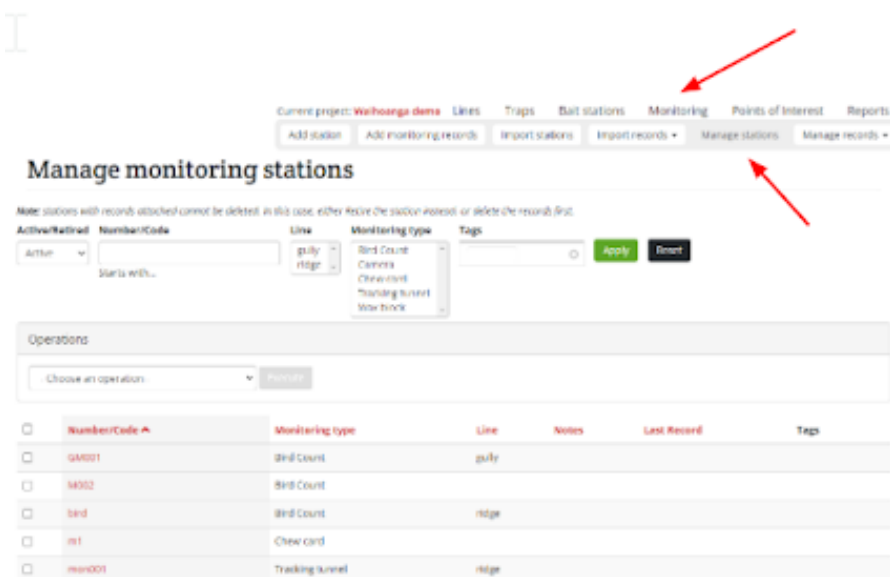

Click this box if the station is no longer used (or moved to a different area). The station will be removed from most displays but historical data will be retained.

5. Finally save your changes

Retiring multiple installations

1. Choose the type of installations you are wanting to retire and select **manage stations** this will open the **operations box**

2. Select the installations you are wanting to retire by clicking next to them on the list they will then turn blue with a tick, select the operation ***retire station***

Manage monitoring stations

Note: stations with records attached cannot be deleted. In this case, either Retire the station instead, or delete the records first.
