

# Setting up a Bird count monitoring station

After undertaking pest eradication in an area, you will see a decline in catches and bait take, however, another way to see if there has been an improvement is to complete regular bird counts. trap.nz phone app has a bird count function to help you complete this.

A bird count should be held at the same time, date, and season as previously, however, any monitoring that is taking place is good, and will still show changes. The protocol for the 5-minute bird count is here

<https://www.doc.govt.nz/globalassets/documents/science-and-technical/inventory-monitoring/im-toolbox-birds-incomplete-five-min-counts.pdf>

To set up a Bird count station

You will need to add a monitoring station either via the phone app or website and select “monitoring type” - bird count.

## Setting up a Bird-count station via the website

Click the install tab on the bottom right of the map window

The screenshot shows the trap.nz website interface for setting up monitoring stations. At the top, there is a navigation bar with links: My projects, Find projects, Forums, Help, My account, and Log out. Below this, a breadcrumb trail shows the current project: demo 1. The main navigation tabs include Lines, Traps, Bait stations, Monitoring (which is selected), Points of Interest, and Reports. A secondary set of buttons includes 'Add station' (highlighted with a mouse cursor), 'Add monitoring records', 'Import stations', 'Import records', 'Manage stations', and 'Manage records'. The 'Monitoring stations' section features a form with the following fields: 'Retired' (set to 'Active'), 'Number / Code' (empty), 'Line' (a dropdown menu with options: Ridge line, gorge road, gully, track, tree line, trial line), 'Monitoring type' (a dropdown menu with options: Bird Count, Camera, Chew card, Tracking tunnel, Wax block, camera lure), 'Tags' (empty), and 'Items per page' (set to 50). There are 'Show results' and 'Reset' buttons. At the bottom, there is a map window showing a satellite view of a landscape with a dashed line indicating a monitoring area. The map window has a 'trap.nz' logo in the top left and a 'Install' button in the bottom right.

## Create Monitoring station

Number / Code \*

Location \*

Monitoring type \*

- Select a value -
- Select a value -
- Bird Count**
- Camera
- Chew card
- Tracking tunnel
- Wax block
- camera lure

## Adding a bird count monitoring station via the trap.nz mobile phone app

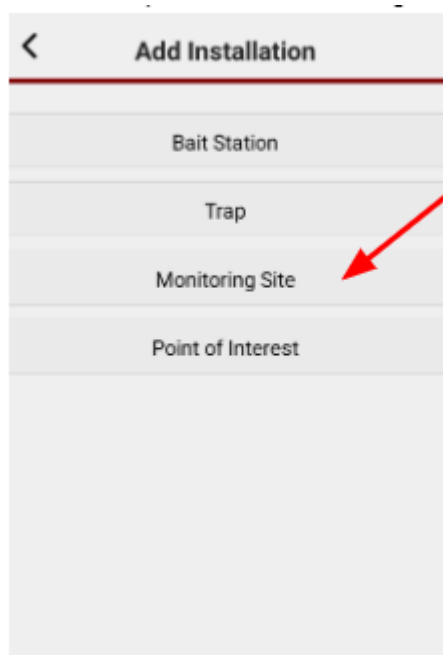

Click the install tab on the bottom right of the map window

Click the green tick that has opened up

Select the option of the monitoring station

Complete the code name, open the monitoring type, and select bird count

Save your new bird count monitoring station

A screenshot of the 'New Monitoring Station' form in the application. The form has a title 'New Monitoring Station' and a timestamp '20/12/2022 09:38'. It contains several input fields: 'Code \*' with the value 'Bird 3', 'Type \*' with a dropdown menu showing 'Bird Count', 'Monitoring line' with a dropdown menu showing 'tree line', and 'Notes'. Below the 'Notes' field is a camera icon. At the bottom of the form are 'SAVE' and 'CANCEL' buttons. A red arrow points to the 'SAVE' button, which has the text 'Press & hold' underneath it.

The bird count station will display on the app as a bird

For instructions on how to use the bird count click here <https://help.trap.nz/books/trapnz-comprehensive-user-guide/page/bird-count-records>
