# The Proximity alert isn't loud enough, how can I get it louder?

If you are finding the proximity function alerts are not loud enough try these steps
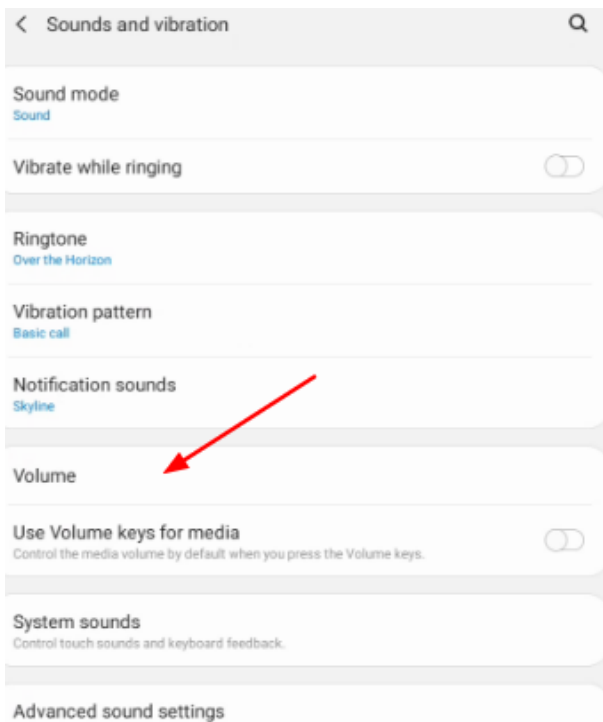

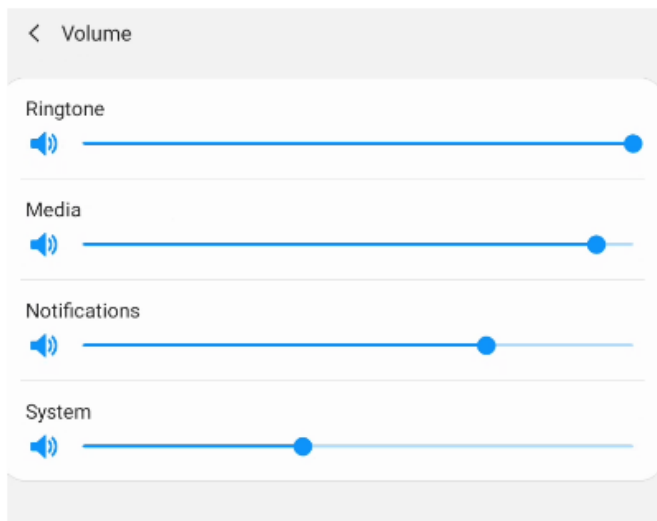

1. Select Settings

2. Select sounds and vibrations

3. Select Volume

4. Here you can set the volume of your various apps, ensure "media" is set high
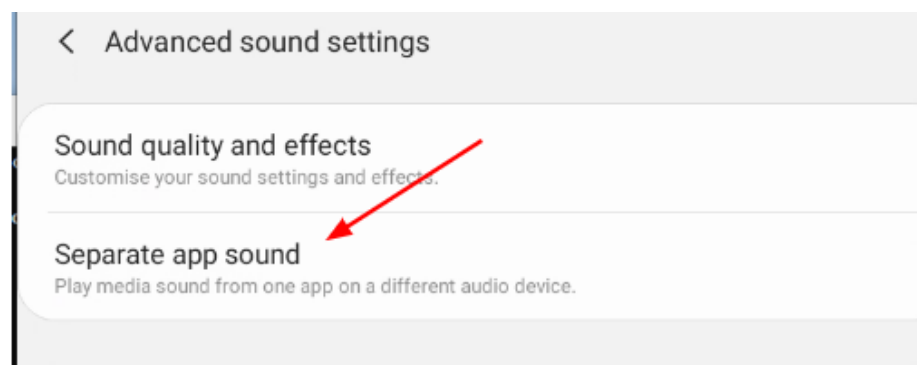

If this doesn't work you can also try the following

5. Select Advanced sound settings

6. Separate App sound

7. Select the App (trap.nz)

8. Now select the device you are wanting the alerts to play on. For example, the alert could play through the Bluetooth in your vehicle

Audio device

Select the audio device you want to use for this app. Bluetooth devices will only be shown while they're connected.

- ⬜ Tablet
- 🔵 **Bluetooth device**
