

Using Advanced field settings app

This setting allows for the option to collect more data than the standard settings while also [enabling contractor mode](#)

1. Open the settings menu on your trap.nz phone app and under the sub-heading Records select [Enable advanced record fields](#)

2. In the advanced field select Enable Contractor Mode

3. As you service your installations after you select the species, you will now have available to you extra fields that allow you to add maturity and sex of the catch

The screenshot shows a record entry form for a species identified as 'R001'. At the top, it says 'No records' with a warning icon. Below this, the record details are shown: 'DOC 200', 'ridge', and a timestamp '23/08/2022 13:35:00'. The form has several fields with dropdown menus: 'Species' (set to 'Rat'), 'Sex' (set to 'Unknown'), 'Life Stage' (set to 'Adult'), and 'Condition' (set to 'OK'). There is a checkbox for 'Re-lured' which is currently unchecked. Below these are two text input fields: 'Lure notes' and 'Notes'. At the bottom, there is a 'Coords' field showing '-40.83530, 175.22124' and a toggle for 'Enable advanced record fields' which is turned off. A 'View Online' button with a globe icon is also present. At the very bottom, there are three buttons: a back arrow, a 'SAVE' button with 'Press & hold' text, and a 'CLOSE' button with a forward arrow.
