

# Using Contractor mode

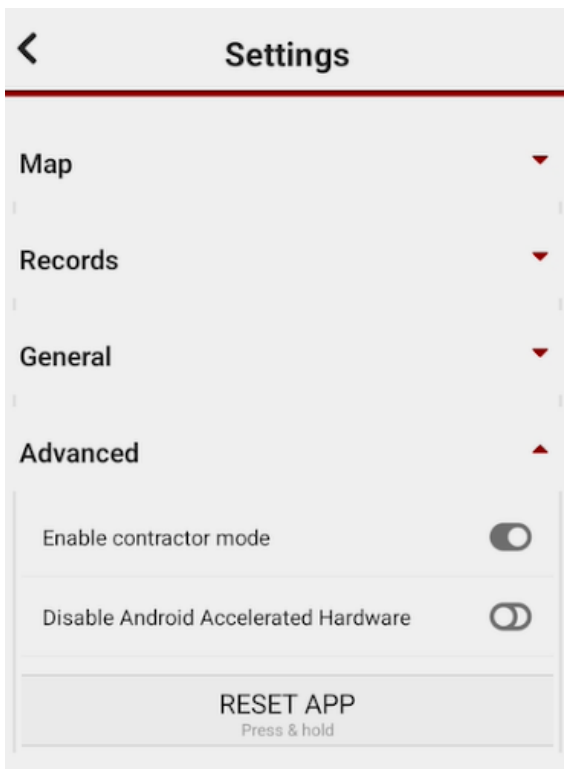

Contractor mode allows you to add property owners' details into an installation's details.

This will help anyone entering another person's property to easily be able to contact them and advise them of the visit.

1. To enable contractor mode select settings on your trap.NZ menu page

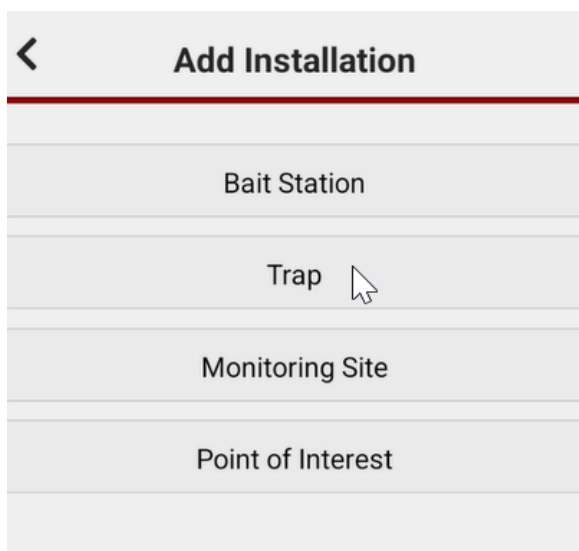

2. Select advanced and enable contractor mode

3. Reset App and hold. Now when you are ready to create a new installation select the green tick.

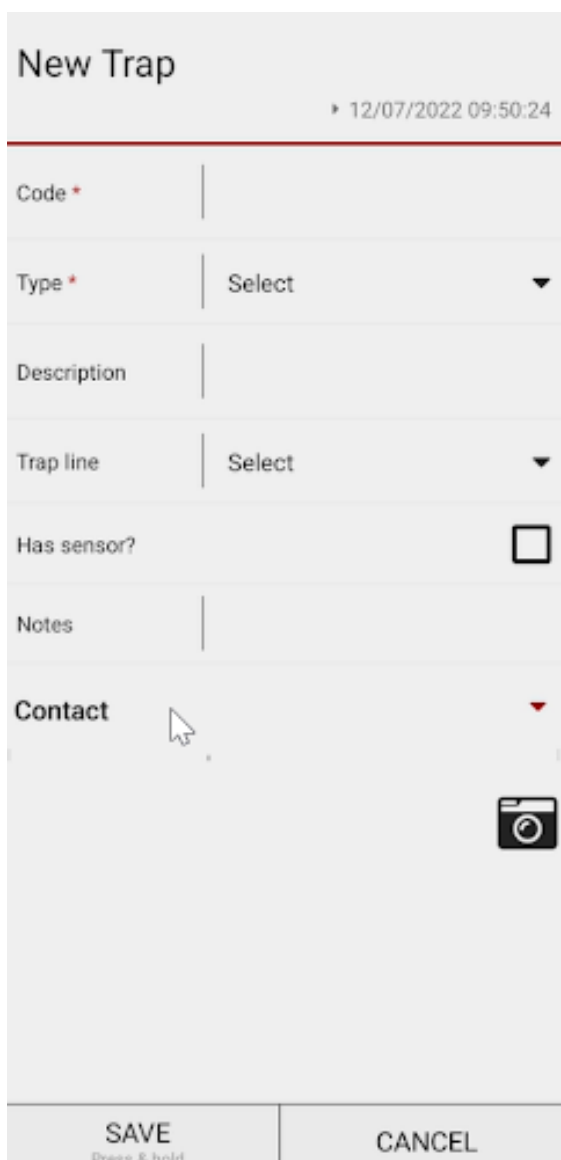

4. Select the installation type

The screenshot shows a mobile application interface titled "Add Installation". It features a list of four installation types: "Bait Station", "Trap", "Monitoring Site", and "Point of Interest". The "Trap" option is currently selected, indicated by a mouse cursor icon pointing at it.

5. You now have a new contact section in your installation details menu

The screenshot displays the "New Trap" form in a mobile application. The form includes several input fields: "Code" (marked with a red asterisk), "Type" (a dropdown menu currently showing "Select"), "Description", "Trap line" (another dropdown menu showing "Select"), "Has sensor?" (a checkbox), and "Notes". A new section titled "Contact" has been added at the bottom of the form, featuring a text input field and a camera icon for uploading a photo. The bottom of the screen contains two buttons: "SAVE" (with the subtext "Press & hold") and "CANCEL". A timestamp "12/07/2022 09:50:24" is visible in the top right corner.

6. This opens up to allow you to record property owners' details
